# COURSEWORK SUBJECTS

---

- Object Oriented Programming
- Cryptography
- Web Development
- Database Management System

## Crypto AirDrop

- ReactJs | ERC20 | Solidity
- Simplify ERC20 token distribution with our smart contract. Utilize Solidity for writing the contract, JavaScript for testing, and Ethers for blockchain interaction. [Github](#)

## Food Ordering Application - UI/UX Project

- Figma | Photoshop
- Revolutionizing college food orders! The app lets students order food from classrooms. Canteen staff efficiently manage orders for quick meal preparation. Enjoy a seamless experience with this responsive design. [Github](#)

## Lead Tracker Chrome Extension

- JavaScript | HTML | CSS | JSON
- Effortlessly store text and bookmark websites with our Chrome extension. Enjoy a user-friendly interface built using HTML, CSS, and JavaScript with ES6 concepts. [Github](#)

## Calculator DApp

- ReactJs | HTML | CSS | Solidity | EtherJs
- Perform secure arithmetic operations on the Ethereum test network with this DApp. Utilize React.js for a user-friendly interface, Remix for smart contract deployment, and Ganache as a local blockchain. [Github](#)

## Minor UI/UX Projects

- Figma
- Built three captivating minor UI/UX projects showcasing creativity and interactivity. Explore a visually appealing fashion ecommerce website, experience the enchanting parallax effect, and witness time come to life with a captivating clock ticking effect [Github](#)

## Library Management System

- Figma
- Efficiently manage books with our Python project. Utilize Object-Oriented Programming principles for seamless book borrowing, returning, and donation. Track all issued books effortlessly. [Github](#)
